COMMENTARIES

3569 Statin-Induced Insulin Resistance Through Inflammasome Activation: Sailing Between Scylla and Charybdis
P. Mitchell and A. Marette

3572 Losing a Grip on the Notion of β-Cell Specificity for Immune Responses in Type 1 Diabetes: Can We Handle the Truth?
M.A. Atkinson

3575 A Lifetime on the Hips: Programming Lower-Body Fat to Protect Against Metabolic Disease
M.M. Swarbrick

3578 Characterizing Subgroups of Type 1 Diabetes
J.S. Skyler

3581 The Type 1 Diabetes Signature: Hardwired to Trigger Inflammation?
K.T. Coppieters and M.G. von Herrath

3584 Clocking Up GLP-1: Considering Intestinal Rhythms in the Incretin Effect
F. Reimann and A.B. Reddy

3587 Dicarbonyl Stress and Atherosclerosis: Is It All RAGE?
R. Muniyappa and P.R. Srinivas

3590 Neuroretinal Degeneration in Relation to Vasculopathy in Diabetes
P.D. Verbraak

3593 PTH-Vitamin D-Glycemia Interactions Reloaded
P. Lee

TECHNOLOGICAL ADVANCES

3596 White Matter Integrity Disruptions Associated With Cognitive Impairments in Type 2 Diabetic Patients
J. Zhang, Y. Wang, J. Wang, X. Zhou, N. Shu, Y. Wang, and Z. Zhang

METABOLISM

3606 Free Fatty Acid Uptake in Humans With CD36 Deficiency
K.C. Hames, A. Vella, B.J. Kemp, and M.D. Jensen

3615 NT-PGC-1α Activation Attenuates High-Fat Diet-Induced Obesity by Enhancing Brown Fat Thermogenesis and Adipose Tissue Oxidative Metabolism
H.-J. Jun, Y. Joshi, Y. Patil, R.C. Noland, and J.S. Chang

3626 Mangiferin Stimulates Carbohydrate Oxidation and Protects Against Metabolic Disorders Induced by High-Fat Diets

3637 SIRT1 Mediates the Effect of GLP-1 Receptor Agonist Exenatide on Ameliorating Hepatic Steatosis

3647 Hypothalamic Neurogenesis Is Not Required for the Improved Insulin Sensitivity Following Exercise Training

3659 SIK2 Is Critical in the Regulation of Lipid Homeostasis and Adipogenesis In Vivo

3674 Circadian Secretion of the Intestinal Hormone GLP-1 by the Rodent L Cell

3686 Temperature-Acclimated Brown Adipose Tissue Modulates Insulin Sensitivity in Humans

3699 Heterozygous SOD2 Deletion Impairs Glucose-Stimulated Insulin Secretion, but Not Insulin Action, in High-Fat-Fed Mice

Keep up with the latest information for Diabetes and other ADA titles via Facebook (/ADAJournals) and Twitter (@ADA_Journals).

All articles in Diabetes are available online at diabetes.org/diabetes, are available free to print subscribers, or can be purchase as e-prints or reprints.

ADA’s Diabetes Core Update podcast is available at diabetesjournals.org and through iTunes.

Icons shown below appear on the first page of an article if more information is available online.
3711 Coinfusion of Low-Dose GLP-1 and Glucagon in Man Results in a Reduction in Food Intake

3721 Mechanisms of Increased In Vivo Insulin Sensitivity by Dietary Methionine Restriction in Mice
K.P. Stone, D. Wanders, M. Orgeron, C.C. Cortez, and T.W. Gettys

3734 Prohibitin Overexpression in Adipocytes Induces Mitochondrial Biogenesis, Leads to Obesity Development, and Affects Glucose Homeostasis in a Sex-Specific Manner

3742 Fluvastatin Causes NLRP3 Inflammasome-Mediated Adipose Insulin Resistance
B.D. Henrikso, T.C. Lau, J.P. Cavallari, E. Denou, W. Chi, J.S. Lally, J.D. Crane, B.M. Duggan, K.P. Foley, M.D. Fullerton, M.A. Tarnopolsky, G.R. Steinberg, and J.D. Schertzer

OBESITY STUDIES

3759 Ultraviolet Radiation Suppresses Obesity and Symptoms of Metabolic Syndrome Independently of Vitamin D in Mice Fed a High-Fat Diet

3770 Fractalkine (CX3CL1) Is Involved in the Early Activation of Hypothalamic Inflammation in Experimental Obesity

3785 Distinct Developmental Profile of Lower-Body Adipose Tissue Defines Resistance Against Obesity-Associated Metabolic Complications

3798 Effect of Guanylate Cyclase-C Activity on Energy and Glucose Homeostasis

ISLET STUDIES

3805 Downregulation of Carnitine Acyl-Carnitine Translocase by miRNAs 132 and 212 Amplifies Glucose-Stimulated Insulin Secretion

IMMUNOLOGY AND TRANSPLANTATION

3815 Nucleotides Released From Palmitate-Challenged Muscle Cells Through Pannexin-3 Attract Monocytes
N.J. Pillon, Y.E. Li, L.N. Fink, J.T. Brozinick, A. Nikolayev, M.S. Kuo, P.J. Bilan, and A. Klip

3827 Type 1 Diabetes in NOD Mice Unaffected by Mast Cell Deficiency

3835 Blood and Islet Phenotypes Indicate Immunological Heterogeneity in Type 1 Diabetes

PATHOPHYSIOLOGY

3846 β-Cell Function, Incretin Effect, and Incretin Hormones in Obese Youth Along the Span of Glucose Tolerance From Normal to Prediabetes to Type 2 Diabetes

3856 Tissue-Specific Differences in the Development of Insulin Resistance in a Mouse Model for Type 1 Diabetes

3868 Prospective Associations of Vitamin D Status With β-Cell Function, Insulin Sensitivity, and Glycemia: The Impact of Parathyroid Hormone Status

3880 Increased Immune Cell Infiltration of the Exocrine Pancreas: A Possible Contribution to the Pathogenesis of Type 1 Diabetes
T. Rodriguez-Calvo, O. Ekwall, N. Amirian, J. Zapardiel-Gonzalo, and M.G. von Herrath

COMPLICATIONS

3891 Exendin-4, a GLP-1 Receptor Agonist, Attenuates Prostate Cancer Growth

3906 Retinal Vessel Calibers Predict Long-term Microvascular Complications in Type 1 Diabetes: The Danish Cohort of Pediatric Diabetes 1987 (DCPD1987)

3915 Dicarbonyl Stress in the Absence of Hyperglycemia Increases Endothelial Inflammation and Atherogenesis Similar to That Observed in Diabetes
C. Tikellis, R.J. Pickering, D. Tsorotes, O. Huet, M.E. Cooper, K. Jandelet-Dahm, and M.C. Thomas

3926 Neuroretinal Dysfunction With Intact Blood-Retinal Barrier and Absent Vasculopathy in Type 1 Diabetes
A. Reis, C. Mateus, P. Melo, F. Figureira, J. Cunha-Vaz, and M. Castelo-Branco

3938 Trends in Incidence of Type 1 Diabetes Among Non-Hispanic White Youth in the U.S., 2002–2009
PHARMACOLOGY AND THERAPEUTICS

3946 Changes in Glucose and Fat Metabolism in Response to the Administration of a Hepato-Preferential Insulin Analog

GENETICS/GENOMES/PROTEOMICS/METABOLOMICS

3955 Fat Mass and Obesity-Associated Gene (FTO) Is Linked to Higher Plasma Levels of the Hunger Hormone Ghrelin and Lower Serum Levels of the Satiety Hormone Leptin in Older Adults
C. Benedict, T. Axelsson, S. Söderberg, A. Larsson, E. Ingelsson, L. Lind, and H.B. Schiöth

ERRATUM

3974 Transcription Factor 7-Like 2 Regulates b-Cell Survival and Function in Human Pancreatic Islets. Diabetes 2008;57:645–653

ISSUES AND EVENTS

3975 Issues and Events

The American Diabetes Association (ADA) is the nation’s leading voluntary health organization supporting diabetes research, information, and advocacy. Its mission is to prevent and cure diabetes and to improve the lives of all people affected by diabetes. ADA is the leading publisher of comprehensive diabetes information. Its huge library of books and periodicals covers every aspect of diabetes and diabetes care.

To join ADA: Call 1-800-806-7801 or visit professional.diabetes.org/membership
To subscribe to ADA journals: Call 1-800-DIABETES or go to diabetesjournals.org
To order ADA books: Call 1-800-232-6733 or visit shopdiabetes.org
To access ADA’s library of professional resources: Go to professional.diabetes.org
For more information about diabetes or ADA programs and services: Call 1-800-DIABETES. E-mail: AskADA@diabetes.org or visit diabetes.org
To locate an ADA/NCQA Recognized Provider of quality diabetes care in your area: Visit recognition.ncqa.org
To join the fight to increase funding for diabetes research, end discrimination, and improve insurance coverage: Call 1-800-DIABETES or visit diabetes.org/advocacy
To find out how you can get involved with the programs in your community: Call 1-800-DIABETES or visit diabetes.org/in-my-community
To find out about important research regarding diabetes: Go to diabetes.org/research-and-practice
To make a donation or memorial contribution: Call 1-800-DIABETES or visit diabetes.org/donate

On the cover: The seventeenth century engraving of Scylla and Charybdis by Matthäus Merian the Elder. Scylla and Charybdis is an idiom from Greek mythology meaning “between a rock and a hard place.” (A in the engraving represents Scylla, and B is Charybdis.) This issue of Diabetes features a Commentary by Mitchell and Marette, “Statin-Induced Insulin Resistance Through Inflammasome Activation: Sailing Between Scylla and Charybdis” (p. 3569).
Correction: The September 2014 cover caption was incorrect. The caption should read: Differential interference contrast immunofluorescence image of a section through a rat pancreatic islet showing hormone-producing cells. The α-cells producing glucagon are labeled in red, and the β-cells producing insulin are in green. Image by Michelle B. Trevino, graduate student enrolled in the 2013 Immunohistochemistry and Microscopy Course at the Marine Biological Laboratory in Woods Hole, MA.
