1821 In This Issue of Diabetes

COMMENTARIES

1823 RNA Sequencing of All Transcripts and How Islet β-Cells Fail
C.J. Nolan and V. Delghingaro-Augusto

1826 Timing Is Everything: Implications for Metabolic Consequences of Sleep Restriction
C.S. Colwell and A.V. Matveyenko

1829 DPP-4 Inhibitors—Renoprotection in Diabetic Nephropathy?
U. Panchapakesan and C.A. Pollock

1831 Stress Response Signaling Pathways May Lead to Mitochondrial Biogenesis
M. Luo and M.-L.A. Joiner

1833 Interleukin-1 Antagonism: A Sturdy Companion for Immune Tolerance Induction in Type 1 Diabetes?
T. Mandrup-Poulsen

1836 Physiology Helps GWAS Take a Step Closer to Mechanism
T.M. Frayling and A.T. Hattersley

1838 IL-21 and IRF4: A Complex Partnership in Immune and Metabolic Regulation
N.H. Knudsen and C.-H. Lee

1841 Stem Cell Senescence in Diabetes: Forgetting the Sweet Old Memories
D. Cesselli and A.P. Belrami

1844 Endogenous, Adipocyte-Derived Lipids Signal the Recruitment of Proinflammatory Immune Cells
G.I. Lancaster and K.G. Langley

1847 Complexity of Impaired Parasympathetic Heart Rate Regulation in Diabetes
J. Jordan and J. Tank

1850 Homeostastic Model Assessment and Insulin Sensitivity/Resistance
J. Radziuk

1855 How Does B-Cell Tolerance Contribute to the Protective Effects of Diabetes Following Induced Mixed Chimerism in Autoimmune Diabetes?
P.S. Wong

1858 The Extracellular Matrix Protein MAGP1 Is a Key Regulator of Adipose Tissue Remodeling During Obesity
M.C. Levin and J. Borén

METABOLISM

1860 Circadian Misalignment Augments Markers of Insulin Resistance and Inflammation, Independently of Sleep Loss
R. Leproult, U. Holmback, and E. Van Cauter

1870 B-Cell Translocation Gene 2 Regulates Hepatic Glucose Homeostasis via Induction of Orphan Nuclear Receptor Nur77 in Diabetic Mouse Model

1881 Activating HSP72 in Rodent Skeletal Muscle Increases Mitochondrial Number and Oxidative Capacity and Decreases Insulin Resistance

1895 Orexinergic Activation of Medullary Premotor Neurons Modulates the Adrenal Sympathoexcitation to Hypothalamic Glucoprivation
W.S. Korim, L. Bou Farah, S. McMullan, and A.J.M. Verberne

1907 High-Fat Diet–Induced Mitochondrial Biogenesis Is Regulated by Mitochondrial-Derived Reactive Oxygen Species Activation of CaMKII

1914 Failure of Homeostatic Model Assessment of Insulin Resistance to Detect Marked Diet-Induced Insulin Resistance in Dogs
M. Ader, D. Stefanovski, J.M. Richey, S.P. Kim, C.M. Kolka, V. Ionut, M. Kabir, and R.N. Bergman

SIGNAL TRANSDUCTION

1920 The Extracellular Matrix Protein MAGP1 Supports Thermogenesis and Protects Against Obesity and Diabetes Through Regulation of TGF-β

Keep up with the latest information for Diabetes and other ADA titles via Facebook (/ADAJournals) and Twitter (@ADA_Journals).

All articles in Diabetes are available online at diabetes.org/diabetes, are available free to print subscribers, or can be purchase as e-prints or reprints.

Icons shown below appear on the first page of an article if more information is available online.
1933 Increased Interaction With Insulin Receptor Substrate 1, a Novel Abnormality in Insulin Resistance and Type 2 Diabetes

1948 RAGE Regulates the Metabolic and Inflammatory Response to High-Fat Feeding in Mice

1994 The MafA Transcription Factor Becomes Essential to Islet 1

1997 Glycogen Synthase Kinase-3β Inhibition Ameliorates Cardiac Parasympathetic Dysfunction in Type 1 Diabetic Akita Mice

2003 Compromised Gut Microbiota Networks in Children

2006 Evidence for a Causal Relationship Between Early Exocrine Pancreatic Disease and Cystic Fibrosis-Related Diabetes: A Mendelian Randomization Study

2015 Combination Therapy With an Anti–IL-1β Antibody and GAD65 DNA Vaccine Can Reverse Recent-Onset Diabetes in the RIP–GP Mouse Model

Pathophysiology

2063 Epidermal Growth Factor Receptor Inhibition Slows Progression of Diabetic Nephropathy in Association With a Decrease in Endoplasmic Reticulum Stress and an Increase in Autophagy
M.-Z. Zhang, Y. Wang, P. Pauksakon, and R.C. Harris

2073 Vanin-1 Is a Key Activator for Hepatic Gluconeogenesis

2086 IL-21 Is a Major Negative Regulator of IRF4-Dependent Lipolysis Affecting Tregs in Adipose Tissue and Systemic Insulin Sensitivity

2087 Induction of Mixed Chimerism Depletes Pre-existing and De Novo–Developed Autoreactive B Cells in Autoimmune NOD Mice
J.J. Racine, M. Wang, M. Zhang, and D. Zeng

Obesity Studies

2014 Obesity Studies
J.J. Racine, M. Wang, M. Zhang, and D. Zeng

Immunology and Transplantation

2015 Combination Therapy With an Anti–IL-1β Antibody and GAD65 DNA Vaccine Can Reverse Recent-Onset Diabetes in the RIP–GP Mouse Model

2026 Dietary Supplementation With High Doses of Regular Vitamin D3 Safely Reduces Diabetes Incidence in NOD Mice When Given Early and Long Term

2037 Endogenous Oils Derived From Human Adipocytes Are Potent Adjuvants That Promote IL-1α–Dependent Inflammation

2051 Induction of Mixed Chimerism Depletes Pre-existing and De Novo–Developed Autoreactive B Cells in Autoimmune NOD Mice
J.J. Racine, M. Wang, M. Zhang, and D. Zeng
Polygenic Type 2 Diabetes Prediction at the Limit of Common Variant Detection

ERRATA

Incretin Therapy and Pancreatic Pathologies: Background Pathology Versus Drug-Induced Pathology in Rats. Diabetes 2014;63:1174–1178
J.M. Egan and C.W. Chia

Hydrogen Sulfide Improves Wound Healing via Restoration of Endothelial Progenitor Cell Functions and Activation of Angiopoietin-1 in Type 2 Diabetes. Diabetes 2014;63:1763–1778

Body Fat Partitioning Does Not Explain the Interethnic Variation in Insulin Sensitivity Among Asian Ethnicity: The Singapore Adults Metabolism Study. Diabetes 2014;63:1093–1102
C.M. Khoo, M.K.-S. Leow, S.A. Sadananthan, R. Lim, K. Venkataraman, E. Yin, H. Khoo, S.S. Velan, Y.T. Ong, R. Kambadur, C. McFarlane, P.D. Gluckman, Y.S. Lee, Y.S. Chong, and E.S. Tai

ISSUES AND EVENTS

Issues and Events

The American Diabetes Association (ADA) is the nation’s leading voluntary health organization supporting diabetes research, information, and advocacy. Its mission is to prevent and cure diabetes and to improve the lives of all people affected by diabetes. ADA is the leading publisher of comprehensive diabetes information. Its huge library of books and periodicals covers every aspect of diabetes and diabetes care.

To join ADA: Call 1-800-806-7801 or visit professional.diabetes.org/membership
To subscribe to ADA journals: Call 1-800-DIABETES or go to diabetesjournals.org
To order ADA books: Call 1-800-232-6733 or visit shopdiabetes.org
To access ADA’s library of professional resources: Go to professional.diabetes.org
For more information about diabetes or ADA programs and services: Call 1-800-DIABETES. E-mail: AskADA@diabetes.org or visit diabetes.org
To locate an ADA/NCQA Recognized Provider of quality diabetes care in your area: Visit recognition.ncqa.org
To join the fight to increase funding for diabetes research, end discrimination, and improve insurance coverage: Call 1-800-DIABETES or visit diabetes.org/advocacy
To find out how you can get involved with the programs in your community: Call 1-800-DIABETES or visit diabetes.org/in-my-community
To find out about important research regarding diabetes: Go to diabetes.org/research-and-practice
To make a donation or memorial contribution: Call 1-800-DIABETES or visit diabetes.org/donate

Cover: The image is a computer screen display of a human DNA sequence from the Human Genome Project. This issue of Diabetes features an article examining diabetes risk loci, “Impact of Type 2 Diabetes Susceptibility Variants on Quantitative Glycemic Traits Reveals Mechanistic Heterogeneity,” by Dimas et al. (p. 2158) and an accompanying commentary, “Physiology Helps GWAS Take a Step Closer to Mechanism,” by Frayling and Hattersley (p. 1836). Credit: James King-Holmes/Science Photo Library.
