3629 In This Issue of Diabetes

PERSPECTIVES IN DIABETES

3631 β-Cell MicroRNAs: Small but Powerful
S.R. Filios and A. Shalev

COMMENTARIES

3645 Caveolin-1 in Cardiovascular Disease: A Double-Edged Sword
G. Jia and J.R. Sowers

3648 Human Growth Hormone in Transgenesis: A Growing Problem?
B. Brouwers and J.W.M. Creemers

3651 Sweet and Low on Leptin: Hormonal Regulation of Sweet Taste Buds
N. Kubasova, D. Burdakov, and A.I. Domingos

3653 A Key Role of Insulin Receptors in Memory
F.G. De Felice and C. Benedict

3656 Enhancing the Metabolic Benefits of Bariatric Surgery: Tipping the Scales With Exercise
I.R. Lanza

METABOLISM

3659 Elevated Hepatic miR-22-3p Expression Impairs Gluconeogenesis by Silencing the Wnt-Responsive Transcription Factor Tcf7
K. Kaur, S. Vig, R. Srivastava, A. Mishra, V.P. Singh, A.K. Srivastava, and M. Datta

3670 Gpr17 in AgRP Neurons Regulates Feeding and Sensitivity to Insulin and Leptin
H. Ren, J.R. Cook, N. Kon, and D. Accili

3680 Energy Expenditure Responses to Fasting and Overfeeding Identify Phenotypes Associated With Weight Change
M. Schlög, P. Piaggi, N. Pannaccìùli, S.M. Bonfiglio, J. Krakoff, and M.S. Thearle

3690 Seven-Day Caloric and Saturated Fat Restriction Increases Myocardial Dietary Fatty Acid Partitioning in Impaired Glucose-Tolerant Subjects

3700 Ectopic UCP1 Overexpression in White Adipose Tissue Improves Insulin Sensitivity in Lou/C Rats, a Model of Obesity Resistance

3713 Matrix-Assisted Transplantation of Functional Beige Adipose Tissue

3725 Hypothalamic Nesfatin-1 Stimulates Sympathetic Nerve Activity via Hypothalamic ERK Signaling

3737 Exercise and Weight Loss Improve Muscle Mitochondrial Respiration, Lipid Partitioning, and Insulin Sensitivity After Gastric Bypass Surgery

SIGNAL TRANSDUCTION

3751 Leptin Suppresses Mouse Taste Cell Responses to Sweet Compounds
R. Yoshida, K. Noguchi, N. Shigemura, M. Jyotaki, I. Takahashi, R.F. Margolskee, and Y. Ninomiya

OBESITY STUDIES

3763 Selective FFAR2 Agonism Appears to Act via Intestinal PYY to Reduce Transit and Food Intake but Does Not Improve Glucose Tolerance in Mouse Models

ISLET STUDIES

3772 MLL3 and MLL4 Methyltransferases Bind to the MAFA and MAFB Transcription Factors to Regulate Islet β-Cell Function

3784 Augmented Stat5 Signaling Bypasses Multiple Impediments to Lactogen-Mediated Proliferation in Human β-Cells

Keep up with the latest information for Diabetes and other ADA titles via Facebook (/ADAJournals) and Twitter (@ADA_Journals).

All articles in Diabetes are available online at diabetes.org/diabetes, are available free to print subscribers, or can be purchase as e-prints or reprints.

ADA’s Diabetes Core Update podcast is available at diabetesjournals.org and through iTunes.

Icons shown below appear on the first page of an article if more information is available online.
Phenotypic Characterization of MIP-CreERT1Lphi Mice With Transgene-Driven Islet Expression of Human Growth Hormone

TYK2, a Candidate Gene for Type 1 Diabetes, Modulates Apoptosis and the Innate Immune Response in Human Pancreatic β-Cells
L. Marroqui, R.S. Dos Santos, T. Fløyel, F.A. Grieco, I. Santin, A. Op de beek, L. Marselli, P. Marchetti, F. Pociot, and D.L. Eizirik

Type 2 Diabetes–Associated K+ Channel TALK-1 Modulates β-Cell Electrical Excitability, Second-Phase Insulin Secretion, and Glucose Homeostasis
N.C. Vierra, P.K. Dadi, I. Jeong, M. Dickerson, D.R. Powell, and D.A. Jacobson

Activation of FoxM1 Revitalizes the Replicative Potential of Aged β-Cells in Male Mice and Enhances Insulin Secretion

EphA4 Receptor Forward Signaling Inhibits Glucagon Secretion From α-Cells
T. Hutchens and D.W. Piston

c-Kit Receptor Signaling Regulates Islet Vasculature, β-Cell Survival, and Function In Vivo
Z.-C. Feng, A. Popell, J. Li, J. Silverstein, A. Oakie, S.-P. Yee, and R. Wang

Elevations in Circulating Methylated and Unmethylated Preproinsulin DNA in New-Onset Type 1 Diabetes

IMMUNOLOGY AND TRANSPLANTATION

Combination Therapy Reverses Hyperglycemia in NOD Mice With Established Type 1 Diabetes
S. Xue, A. Posgai, C. Wasserfall, C. Myhr, M. Campbell-Thompson, C.E. Mathews, T. Brusko, A. Rabiniwicz, A. Savinov, M. Battaglia, D. Schatz, M. Haller, and M.A. Atkinson

Acute Versus Progressive Onset of Diabetes in NOD Mice: Potential Implications for Therapeutic Interventions in Type 1 Diabetes
C.E. Mathews, S. Xue, A. Posgai, Y.L. Lightfoot, X. Li, A. Lin, C. Wasserfall, M.J. Haller, D. Schatz, and M.A. Atkinson

COMPLICATIONS

ASK1 Inhibitor Halts Progression of Diabetic Nephropathy in Nos3-Deficient Mice
G.H. Tesch, F.Y. Ma, Y. Han, J.T. Liles, D.G. Breckenridge, and D.J. Nikolic-Paterson

Ceramide-Initiated Protein Phosphatase 2A Activation Contributes to Arterial Dysfunction In Vivo

Hippocampal Insulin Resistance Impairs Spatial Learning and Synaptic Plasticity

PHARMACOLOGY AND THERAPEUTICS

Direct Endothelial Nitric Oxide Synthase Activation Provides Atheroprotection in Diabetes-Accelerated Atherosclerosis

GENETICS/GENOMES/PROTEOMICS/METABOLOMICS

A Missense Mutation in PPP1R15B Causes a Syndrome Including Diabetes, Short Stature, and Microcephaly

On the cover: Color-enhanced scanning electron micrograph showing taste buds on the surface of the human tongue. Magnification is ×47 at 35 mm. Credit: Omikron/Science Source. For further information, go to www.sciencesource.com. This issue of Diabetes features two articles on the regulation of sweet taste responses in taste buds: “Sweet and Low on Leptin: Hormonal Regulation of Sweet Taste Buds” (p. 3651) and “Leptin Suppresses Mouse Taste Cell Responses to Sweet Compounds” (p. 3751).
