PERSPECTIVES IN DIABETES

307 Type 1 Diabetes—Reaping the Rewards of a Targeted Research Investment
J.E. Fradkin, J.A. Wallace, B. Akolkar, and G.P. Rodgers

314 Endocrine Pancreas Development and Regeneration: Noncanonical Ideas From Neural Stem Cell Biology
J. Masjkur, S.W. Poser, P. Nikolakopoulou, G. Chrousos, R.D. McKay, S.R. Bornstein, P.M. Jones, and A. Androutsellis-Theotokis

331 Gasotransmitters in Vascular Complications of Diabetes
J.C. van den Born, H.-P. Hammes, W. Greffrath, H. van Goor, and J.-L. Hillebrands, on behalf of the DFG GRK International Research Training Group 1874 Diabetic Microvascular Complications (DIAMICOM)

COMMENTARIES

346 A New Road for Treating the Vascular Complications of Diabetes: So Let’s Step on the Gas
J.L. Evans and I.D. Goldfine

349 Platelet Dysfunction in Type 1 Diabetes: Stressing the Thromboxanes
J.A. Wisiński and M.E. Kimple

352 Reversibility of Defects in Proinsulin Processing and Islet β-Cell Failure in Obesity-Related Type 2 Diabetes
C.J. Nolan and V. Delghingaro-Augusto

355 Diabetic Central Neuropathy: CNS Damage Related to Hyperglycemia
J.I. Malone

METABOLISM

358 Skeletal Muscle Phospholipid Metabolism Regulates Insulin Sensitivity and Contractile Function
K. Funai, I.J. Lodhi, L.D. Spears, L. Yin, H. Song, S. Klein, and C.F. Semenkovich

371 TCF7L2 Genotype and α-Cell Function in Humans Without Diabetes

381 MK2 Deletion in Mice Prevents Diabetes-Induced Perturbations in Lipid Metabolism and Cardiac Dysfunction

393 Activation of ERK1/2 Ameliorates Liver Steatosis in Leptin Receptor–Deficient (db/db) Mice via Stimulating ATG7-Dependent Autophagy

OBESITY STUDIES

406 Obesity in MENVX Rats Is Accompanied by High Circulating Levels of Ghrelin and Improved Insulin Sensitivity
T. Wiedemann, M. Bielohuby, T.D. Müller, M. Billingmaier, and N.S. Pellegata

421 Uroguanylin Action in the Brain Reduces Weight Gain in Obese Mice via Different Effenter Autonomic Pathways

433 Numerous Genes in Loci Associated With Body Fat Distribution Are Linked to Adipose Function
I. Dahlman, M. Rydén, D. Brodin, H. Grallert, R.J. Strawbridge, and P. Arner

ISLET STUDIES

438 Pancreatic β-Cell Adaptive Plasticity in Obesity Increases Insulin Production but Adversely Affects Secretory Function

451 Antiaging Glycopeptide Protects Human Islets Against Tacrolimus–Related Injury and Facilitates Engraftment in Mice
B.L. Gala-Lopez, A.R. Pepper, R.L. Pawlick, D. O’Gorman, T. Kin, A. Bruni, N. Abuahassan, M. Bral, A. Bautista, J.E. Manning Fox, L.G. Young, P.E. MacDonald, and A.M.J. Shapiro

Keep up with the latest information for Diabetes and other ADA titles via Facebook (/ADAJournals) and Twitter (@ADA_Journals).

All articles in Diabetes are available online at diabetes.org/diabetes, are available free to print subscribers, or can be purchase as e-prints or reprints.

ADA’s Diabetes Core Update podcast is available at diabetesjournals.org and through iTunes.

Icons shown below appear on the first page of an article if more information is available online.
Metabolism Regulates Exposure of Pancreatic Islets to Circulating Molecules In Vivo

PATHOPHYSIOLOGY

Variations in Brain Volume and Growth in Young Children With Type 1 Diabetes

COMPlications

Measurements of CD34+/CD45-dim Stem Cells Predict Healing of Diabetic Neuropathic Wounds

Plasma Prekallikrein Is Associated With Carotid Intima-Media Thickness in Type 1 Diabetes

PHARMACOLOGY AND THERAPEUTICS

In Vivo Platelet Activation and Aspirin Responsiveness in Type 1 Diabetes

GENETICS/GENOMES/PROTEOMICs/METABOLOMICS

Analysis of SLC16A11 Variants in 12,811 American Indians: Genotype-Obesity Interaction for Type 2 Diabetes and an Association With RNA5EK Expression

Lifestyle and Metformin Ameliorate Insulin Sensitivity Independently of the Genetic Burden of Established Insulin Resistance Variants in Diabetes Prevention Program Participants

On the cover: A screen capture image of a three-dimensional reconstruction of electron microscope tomography analysis of a multivesicular body commonly observed in hard-working pancreatic β-cells from db/db mice. This is a first three-dimensional view of this organelle, which is featured in the article “Pancreatic β-Cell Adaptive Plasticity in Obesity Increases Insulin Production but Adversely Affects Secretory Function” (p. 438) in this issue of Diabetes.
