

Supplemental Figure

Supplemental Figure. No alteration in β -cell apoptosis in D2KO/LIRKO islets. Co-immunostaining for TUNEL (green) and insulin (red) in pancreas sections from control, LIRKO, D2KO, and D2KO/LIRKO mice. Arrows: cells positive for TUNEL staining in pancreatic acinar or duodenum used as positive controls. Representative islets for each group at magnification 20x are presented. n=4.
