
Errata

In the article "The insulin receptor: a multifunctional protein," by J.M. Olefsky (*Diabetes* 39:1009–16, 1990), during the editorial production process, a citation was inadvertently omitted. Credit was not given for the fact that Fig. 1, depicting insulin-receptor gene intron/extron structure, was adapted from S. Seino, M. Seino, and G.I. Bell (*Diabetes* 39:129–33, 1990) with kind permission from Dr. Bell. We apologize for this omission.

In the article "Glucose-induced electrical activity in β -cells: feedback control of ATP-sensitive K^+ channels by Ca^{2+} ?" by J.-C. Henquin (*Diabetes* 39:1457–60, 1990), during the editorial production process, the question mark was omitted from the title. We apologize for this oversight.
