

Erratum

Erratum. The Effects of Type 2 Diabetes on Lipoprotein Composition and Arterial Stiffness in Male Youth. *Diabetes* 2013;62:2958–2967

DOI: 10.2337/db16-er07

In the article listed above, there is an error in Fig. 1B. The authors recently noted an error in the cholesterol profile across gel filtration fractions: two of the traces were replicates of the phospholipid data. The data from lean (green) participants are correct but the data from participants who were obese (blue) and had type 2 diabetes (red) are incorrect. The authors stress that this error in no way changed any of the conclusions in the article. The corrected version of Fig. 1B appears below. The online version reflects these changes.
