PERSPECTIVES IN DIABETES

3 Diabetes in China: Epidemiology and Genetic Risk Factors and Their Clinical Utility in Personalized Medication
C. Hu and W. Jia

12 The Adiponectin Paradox for All-Cause and Cardiovascular Mortality
C. Menzaghi and V. Trischitta

COMMENTARY

23 SCP4: A Small Nuclear Phosphatase Having a Big Effect on FoxOs in Gluconeogenesis
X.C. Dong

TECHNOLOGICAL ADVANCES

26 β-Cell Replacement in Mice Using Human Type 1 Diabetes Nuclear Transfer Embryonic Stem Cells

METABOLISM

36 IL-6-Type Cytokine Signaling in Adipocytes Induces Intestinal GLP-1 Secretion
S. Wueest, C.I. Laesser, M. Böni-Schnetzler, F. Item, F.C. Lucchini, M. Borsigova, W. Müller, M.Y. Donath, and D. Konrad

SIGNAL TRANSDUCTION

46 SCP4 Promotes Gluconeogenesis Through FoxO1/3a Dephosphorylation
J. Cao, Y. Yu, Z. Zhang, X. Chen, Z. Hu, Q. Tong, J. Chang, X.-H. Feng, and X. Lin

ISLET STUDIES

58 Inhibition of Cdk5 Promotes β-Cell Differentiation From Ductal Progenitors

71 Deletion of Protein Kinase D1 in Pancreatic β-Cells Impairs Insulin Secretion in High-Fat Diet–Fed Mice

PATHOPHYSIOLOGY

85 Uncoupling Exercise Bioenergetics From Systemic Metabolic Homeostasis by Conditional Inactivation of Bafl60 in Skeletal Muscle
Z.-X. Meng, W. Tao, J. Sun, Q. Wang, L. Mi, and J.D. Lin

COMPLICATIONS

98 Negative Regulation of TRPA1 by AMPK in Primary Sensory Neurons as a Potential Mechanism of Painful Diabetic Neuropathy

110 Deletion of the Akt/mTORC1 Repressor REDD1 Prevents Visual Dysfunction in a Rodent Model of Type 1 Diabetes
W.P. Miller, C. Yang, M.L. Mihalcescu, J.A. Moore, W. Dai, A.J. Barber, and M.D. Dennis

120 Thioredoxin-1 Overexpression in the Ventromedial Nucleus of the Hypothalamus Preserves the Counterregulatory Response to Hypoglycemia During Type 1 Diabetes in Male Rats
C. Zhou and V.H. Routh

131 Evidence That Differences in Fructosamine-3-Kinase Activity May Be Associated With the Glycation Gap in Human Diabetes

GENETICS/GENOMES/PROTEOMICS/METABOLOMICS

137 Insights From Molecular Characterization of Adult Patients of Families With Multigenerational Diabetes

Keep up with the latest information for Diabetes and other ADA titles via Facebook (/ADAJournals) and Twitter (@ADA_Journals).

All articles in Diabetes are available online at diabetes.org/diabetes, are available free to subscribers, or can be purchased as e-prints or reprints.

ADA’s Diabetes Core Update podcast is available at diabetesjournals.org and through iTunes.
Plasma 25-Hydroxyvitamin D Concentration and Risk of Islet Autoimmunity

Shared Genetic Control of Brain Activity During Sleep and Insulin Secretion: A Laboratory-Based Family Study

ERRATUM

Erratum. Deletion of p66Shc Longevity Gene Protects Against Experimental Diabetic Glomerulopathy by Preventing Diabetes-Induced Oxidative Stress.

Diabetes 2006;55:1642–1650

ISSUES AND EVENTS

166 Issues and Events

The American Diabetes Association (ADA) is the nation’s leading voluntary health organization supporting diabetes research, information, and advocacy. Its mission is to prevent and cure diabetes and to improve the lives of all people affected by diabetes. ADA is the leading publisher of comprehensive diabetes information. Its huge library of books and periodicals covers every aspect of diabetes and diabetes care.

To join ADA: Call 1-800-806-7801 or visit professional.diabetes.org/membership

To subscribe to ADA journals: Call 1-800-DIABETES or go to diabetesjournals.org

To order ADA books: Call 1-800-232-6733 or visit shopdiabetes.org

To access ADA’s library of professional resources: Go to professional.diabetes.org

For more information about diabetes or ADA programs and services: Call 1-800-DIABETES. E-mail: AskADA@diabetes.org or visit diabetes.org

To locate an ADA/NCQA Recognized Provider of quality diabetes care in your area: Visit recognition.ncqa.org

To join the fight to increase funding for diabetes research, end discrimination, and improve insurance coverage: Call 1-800-DIABETES or visit diabetes.org/advocacy

To find out how you can get involved with the programs in your community: Call 1-800-DIABETES or visit diabetes.org/in-my-community

To find out about important research regarding diabetes: Go to diabetes.org/research-and-practice

To make a donation or memorial contribution: Call 1-800-DIABETES or visit diabetes.org/donate

On the cover: Islet clusters derived from nuclear transfer embryonic stem cells reprogrammed from a skin fibroblast of a patient with type 1 diabetes. Image courtesy of Lina Sui, Naomi Berrie Diabetes Center and Department of Pediatrics, College of Physicians and Surgeons, Columbia University Medical Center, New York, NY. Her article, “β-Cell Replacement in Mice Using Human Type 1 Diabetes Nuclear Transfer Embryonic Stem Cells,” appears in this issue of Diabetes (p. 26).
