PERSPECTIVES IN DIABETES

2485 Targeting Metabolism, Insulin Resistance, and Diabetes to Treat Nonalcoholic Steatohepatitis
B.N. Finck

METABOLISM

2494 CETP Inhibition Improves HDL Function but Leads to Fatty Liver and Insulin Resistance in CETP-Expressing Transgenic Mice on a High-Fat Diet

2507 Effect of Chronic Hyperglycemia on Glucose Metabolism in Subjects With Normal Glucose Tolerance

2518 Distinct Neuronal Projections From the Hypothalamic Ventromedial Nucleus Mediate Glycemic and Behavioral Effects

2530 Paternal Exercise Improves Glucose Metabolism in Adult Offspring

SIGNAL TRANSDUCTION

2541 miR-30a Remodels Subcutaneous Adipose Tissue Inflammation to Improve Insulin Sensitivity in Obesity

2554 miRNA Regulation of the Hyperproliferative Phenotype of Vascular Smooth Muscle Cells in Diabetes

2569 Pygo2 Regulates Adiposity and Glucose Homeostasis via β-Catenin–Axin2–GSK3β Signaling Pathway

OBESITY STUDIES

2585 Obesity-Associated miR-199a/214 Cluster Inhibits Adipose Browning via PRDM16–PGC-1α Transcriptional Network

ISLET STUDIES

2601 Glucagon-Like Peptide 1 Increases β-Cell Regeneration by Promoting α- to β-Cell Transdifferentiation

2615 Haploinsufficiency of Insm1 Impairs Postnatal Baseline β-Cell Mass
W. Tao, Y. Zhang, L. Ma, C. Deng, H. Duan, X. Liang, R. Liao, S. Lin, T. Nie, W. Chen, C. Wang, C. Birchmeier, and S. Jia

2626 Syntaxin 4 Expression in Pancreatic β-Cells Promotes Islet Function and Protects Functional β-Cell Mass
E. Oh, M. Ahn, S. Afelik, T.C. Becker, B.O. Roep, and D.C. Thurmond

IMMUNOLOGY AND TRANSPLANTATION

2640 Increase Functional β-Cell Mass in Subcutaneous Alginate Capsules With Porcine Prenatal Islet Cells but Loss With Human Adult Islet Cells

PATHOPHYSIOLOGY

2650 Reduced GLP-1 Secretion at 30 Minutes After a 75-g Oral Glucose Load Is Observed in Gestational Diabetes Mellitus: A Prospective Cohort Study
N. Sukumar, C. Bagias, I. Goljan, Y. Weldeselassie, S. Gharanei, B.K. Tan, J.J. Holst, and P. Saravanam

Keep up with the latest information for Diabetes and other ADA titles via Facebook (/ADAJournals) and Twitter (@ADA_Journals).

All articles in Diabetes are available online at diabetes.org/diabetes, are available free to subscribers, or can be purchased as e-prints or reprints.

ADA’s Diabetes Core Update podcast is available at diabetesjournals.org and through iTunes.
Lipoxins Protect Against Inflammation in Diabetes-Associated Atherosclerosis

Histone H3 Serine 10 Phosphorylation Facilitates Endothelial Activation in Diabetic Kidney Disease

FOXO1 Deletion Reverses the Effect of Diabetic-Induced Impaired Fracture Healing

Insulin Resistance and Vulnerability to Cardiac Ischemia

Genetic Determinants of Glycemic Traits and the Risk of Gestational Diabetes Mellitus

Erratum
Erratum. The Adiponectin Paradox for All-Cause and Cardiovascular Mortality. Diabetes 2018;67:12–22
C. Menzaghi and V. Trischitta

The American Diabetes Association (ADA) is the nation’s leading voluntary health organization supporting diabetes research, information, and advocacy. Its mission is to prevent and cure diabetes and to improve the lives of all people affected by diabetes. ADA is the leading publisher of comprehensive diabetes information. Its huge library of books and periodicals covers every aspect of diabetes and diabetes care.

To join ADA: Call 1-800-806-7801 or visit professional.diabetes.org/membership
To subscribe to ADA journals: Call 1-800-DIABETES or go to diabetesjournals.org
To order ADA books: Call 1-800-232-6733 or visit shopdiabetes.org
To access ADA’s library of professional resources: Go to professional.diabetes.org
For more information about diabetes or ADA programs and services: Call 1-800-DIABETES. Email: AskADA@diabetes.org or visit diabetes.org
To locate an ADA/NCQA Recognized Provider of quality diabetes care in your area: Visit recognition.ncqa.org
To join the fight to increase funding for diabetes research, end discrimination, and improve insurance coverage: Call 1-800-DIABETES or visit diabetes.org/advocacy
To find out how you can get involved with the programs in your community: Call 1-800-DIABETES or visit diabetes.org/in-my-community
To find out about important research regarding diabetes: Go to diabetes.org/research-and-practice
To make a donation or memorial contribution: Call 1-800-DIABETES or visit diabetes.org/donate

On the cover: Islets of Langerhans cells, computer artwork. These cells (pink) of the pancreas release hormones (colored dots) into the blood. Credit: David Mack/Science Source. For further information, please visit www.sciencesource.com.
