In the above-mentioned article, the mean change in measured glomerular filtration rate (GFR) after 1 month of treatment with losartan was erroneously reported in units of mL/min but should have been reported in units of percent. Thus, the second sentence in the righthand column on page 3226 that read “At one month, mean change (±SD) in GFR among subjects receiving losartan was −3.16 ± 16.48 mL/min vs. 0.59 ± 16.00 mL/min in the placebo-treated group (P = 0.15)” should have read “At one month, mean percent change (±SD) in GFR among subjects receiving losartan was −3.16 ± 16.48% vs. 0.59 ± 16.00% in the placebo-treated group (P = 0.15).”

The online version of the article (https://doi.org/10.2337/db12-1512) has been updated to correct this error.
