OBESITY STUDIES

2049 Crucial Role of the SH2B1 PH Domain for the Control of Energy Balance

A. Flores, L.S. Argetsinger, L.K.J. Stadler, A.E. Malaga, P.B. Vander, L.C. DeSantis, R.M. Joe, J.M. Cline, J.M. Keogh, E. Henning, I. Barroso, E. Mendes de Oliveira, G. Chandrashekar, E.S. Clutter, Y. Hu, J. Stuckey, I.S. Farooqi, M.G. Myers Jr., and C. Carter-Su

PATHOPHYSIOLOGY

2063 Role of CCR2 in the Development of Streptozotocin-Treated Diabetic Cardiomyopathy

X. Tan, L. Hu, Z. Shu, L. Chen, X. Li, M. Du, D. Sun, X. Mao, S. Deng, K. Huang, and F. Zhang

2074 Lower Insulin Clearance Parallels a Reduced Insulin Sensitivity in Obese Youths and Is Associated With a Decline in β -Cell Function Over Time

A. Galderisi, D. Polidori, R. Weiss, C. Giannini, B. Pierpont, D. Tricò, and S. Caprio

2085 White Matter Microstructural Change Contributes to Worse Cognitive Function in Patients With Type 2 Diabetes

S. Gao, Y. Chen, F. Sang, Y. Yang, J. Xia, X. Li, J. Zhang, K. Chen, and Z. Zhang

COMPLICATIONS

2095 Diabetes-Induced NF- κ B Dysregulation in Skeletal Stem Cells Prevents Resolution of Inflammation

K.I. Ko, A.L. Syverson, R.M. Kralik, J. Choi, B.P. DerGarabedian, C. Chen, and D.T. Graves

2107 Severe Hypoglycemia-Induced Fatal Cardiac Arrhythmias Are Mediated by the Parasympathetic Nervous System in Rats

C.M. Reno, J. Bayles, Y. Huang, M. Oxspring, A.M. Hirahara, D.J. Dossdall, and S.J. Fisher

2120 *Sarm1* Gene Deficiency Attenuates Diabetic Peripheral Neuropathy in Mice

Y. Cheng, J. Liu, Y. Luan, Z. Liu, H. Lai, W. Zhong, Y. Yang, H. Yu, N. Feng, H. Wang, R. Huang, Z. He, M. Yan, F. Zhang, Y.-G. Sun, H. Ying, F. Guo, and Q. Zhai

2131 A Protective Effect of PPAR α in Endothelial Progenitor Cells Through Regulating Metabolism

Y. Shao, J. Chen, L.-j. Dong, X. He, R. Cheng, K. Zhou, J. Liu, F. Qiu, X.-r. Li, and J.-x. Ma

2143 Amelioration of Both Central and Peripheral Neuropathy in Mouse Models of Type 1 and Type 2 Diabetes by the Neurogenic Molecule NSI-189

C.G. Jolivald, A. Marquez, D. Quach, M.C. Navarro Diaz, C. Anaya, B. Kifle, N. Muttalib, G. Sanchez, L. Guernsey, M. Hefferan, D.R. Smith, P. Fernyhough, K. Johe, and N.A. Calcutt

GENETICS/GENOMES/PROTEOMICS/METABOLOMICS

2155 Genetic Predisposition to Type 2 Diabetes and Risk of Subclinical Atherosclerosis and Cardiovascular Diseases Among 160,000 Chinese Adults

W. Gan, F. Bragg, R.G. Walters, I.Y. Millwood, K. Lin, Y. Chen, Y. Guo, J. Vaucher, Z. Bian, D. Bennett, J. Lv, C. Yu, A. Mahajan, R.J. Clarke, L. Li, M.V. Holmes, M.I. McCarthy, and Z. Chen, on behalf of the China Kadoorie Biobank Collaborative Group

2165 *CACNB2* Is a Novel Susceptibility Gene for Diabetic Retinopathy in Type 1 Diabetes

N. Vuori, N. Sandholm, A. Kumar, K. Hietala, A. Syreeni, C. Forsblom, K. Juuti-Uusitalo, H. Skottman, M. Imamura, S. Maeda, P.A. Summanen, M. Lehto, and P.-H. Groop, on behalf of the FinnDiane Study

2175 Cutaneous Epithelial to Mesenchymal Transition Activator ZEB1 Regulates Wound Angiogenesis and Closure in a Glycemic Status-Dependent Manner
K. Singh, M. Sinha, D. Pal, S. Tabasum, S.C. Gnyawali, D. Khona, S. Sarkar, S.K. Mohanty, F. Soto-Gonzalez, S. Khanna, S. Roy, and C.K. Sen

ISSUES AND EVENTS

2191 Issues and Events

On the cover: Three-dimensional structural model created by overlaying the sequence positions of two human variants in SH2B1 associated with obesity and five human variants in SH2B3/Lnk associated with myeloproliferative neoplasms onto the structure of the PH domain of the SH2B family member SH2B2/APS. The number of human variants in SH2B1 and SH2B3 in this region of the PH domain suggests that small structural changes in this region have the potential to produce substantial functional consequences. Image courtesy of Jeanne Stuckey, Life Sciences Institute and Departments of Biological Chemistry and Biophysics, and Lawrence S. Argetsinger, Department of Molecular and Integrative Physiology, University of Michigan, Ann Arbor, MI. Their article, "Crucial Role of the SH2B1 PH Domain for the Control of Energy Balance," appears in this issue of *Diabetes* (p. 2049).
