

Supplemental Figure : A-D: confocal views of pancreatic islets labeled for insulin (blue), glucagon (red) and actin (green). Arrows show cytoplasmic extension intercalated between alpha-cells and labeled for actin. Scale bar, 20 μm . E and F: confocal views of pancreatic islets labelled for insulin (red) and glucagon (green). F: higher magnification of insert in E. Arrows show the granular staining in a cytoplasmic extension. Scale bars, 10 μm in E, 3 μm in F.
